

Mabanol Direct Injection Petrol Engine Cleaner

Cleaning Agent for Petrol Injection Engines

Application

Mabanol Direct Injection Petrol Engine Cleaner is a fuel additive that cleans petrol injection engines (with or without catalytic exhaust gas converters).

Mabanol Direct Injection Petrol Engine Cleaner should be added to the tank. The ideal dosage is one tin for 50 – 60 liters of fuel.

Properties

Mabanol Direct Injection Petrol Engine Cleaner guarantees a good vaporization. Besides cleaning the injection system, the product prevents knocking and rough idling. Protects catalysts and lambda sensors and helps remove deposits of e.g. coke from injection valves and fuel supply manifolds. Reduces the emission of smoke especially during full load operations. Designed to prevent increased fuel consumption caused by insufficient fuel injection.
