

# Mabanol Krypton Eco UTTO

## Hydraulic Transmission Fluid (UTTO)

### Application

Mabanol Krypton Eco UTTO is formulated for the servicing of farm and construction machinery with common oil systems for gear boxes/final drives and hydraulic systems (UTTO). Mabanol Krypton Eco UTTO complies with the standards required by all major tractor manufacturers. Mabanol Krypton Eco UTTO provides excellent cold flow properties and it can be confidently used as a HLP hydraulic fluid for a wide range of ISO viscosity grades in hydraulic systems of construction equipment. When used for transmissions Mabanol Krypton Eco UTTO fluid exceeds the requirements of API GL-4.

### Properties

Mabanol Krypton Eco UTTO ensures an instant response of hydraulic systems at low ambient temperatures and offers a high degree of lubrication in the power transmission system at extreme loads. The friction characteristics have been adapted to the special requirements of "wet brakes" running in oil baths (particularly with asbestos-free brake pads) and powershift clutches for auxiliary drives.
