

Mabanol Throttle Body Cleaner

Cleaning agent for carburetors / throttle bodies and air-intake systems

Application

Mabanol Throttle Body Cleaner is a highly efficient solvent that removes contaminants and deposits from air-intake systems and carburetors/throttle bodies of gasoline engines. It is well suited for use in 2- and 4-stroke engines as well as engines with fuel injection systems.

Mabanol Throttle Body Cleaner is not suitable for diesel engines.

Spray Mabanol Throttle Body Cleaner thoroughly into the inlet manifold with the engine turned off. Allow a contact time of several minutes. Please remove the air filter element before using the spray. Then start the engine and run it at regular speed before spraying the product into the inlet manifold for about 30 seconds to remove any loosened deposits.

Properties

Mabanol Throttle Body Cleaner prevents the formation of coke and resin deposits in the air-intake system and throttle body and improves the performance of carburetors. This leads to an improved fuel flow and engine performance and cuts exhaust emissions, thus preventing power losses.
