

Mabanol Wire Rope Grease

Corrosion protection wax

Application

Thoroughly clean the parts where Mabanol Wire Rope Grease is to be applied with a brake cleaner whereupon you can use the grease by spraying evenly. Repeated application will lead to the formation of a thick protection film.

Properties

Mabanol Wire Rope Grease is a corrosion protection wax that is designed to lubricate wire ropes on lift and conveyor systems, carrying and lifting ropes and winches. It also offers protection to car underfloors and provides protection against corrosion, moisture and wear (thanks to its OMC2 agents).

A high degree of weather resistance allows fine adhesion and prevents draining even under rather severe circumstances such as the exposure to direct sunlight.

Further to the above the product reaches into tight spaces.
